**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. The crystalline EPCRS form of Risperidone compound according to claim 13. This is classifiable in class 548, subclass various.
- II. The process of preparing EPCRS according to claims 1-12. This is classifiable in class 548.

Inventions of Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make another and materially different product, such as resperidone.

The inventions of Groups I-II are separate and patentably distinct because there is no patentable co-action among them and a reference anticipating or rendering obvious one member will not anticipate or render another obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, a search of the two groups designated above would impose an undue burden upon the examiner, and restriction for examination purposes as indicated is proper.

Art Unit: 1624

A telephone call was made to Robert Franks on May 1, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is requested to **elect a specifically disclosed species** of the invention to be examined for search purposes.

### **Rejoinder Advisory**

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for **rejoinder**. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be **rejoined**.

In the event of **rejoinder**, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the **rejoined** process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder**. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
